

Having thus described and illustrated my new variety of grapevine, what I claim as new and desire to be secured by Plant Letters Patent is:

1. A new and distinct variety of grapevine substantially as illustrated and described which is distinguished by producing seedless fruit which are mature for commercial harvesting and shipment approximately in mid to late October in the San Joaquin Valley of central California, which is vigorous and productive having compact and attractive clusters, with very firm large berries having a generally olive green skin coloration.
